

UNIFY ME™

by AVI  SPL®

Unify ME Virtual Meeting Room Service

AVI-SPL's Unify ME Virtual Meeting Room (VMR) is our cloud-based conferencing service that unifies real-time conferencing tools – voice, video and web - into a single solution, allowing your users to connect anytime, anywhere, using any device.

The Unify ME VMR Advantage

- Connect standards-based and software-based clients into one call
- No reservation needed – easy as making an audio call
- It's your personal conference room without walls – available 24/7/365
- Enterprise-grade security and quality
- Interoperable with H.323, SIP, Skype for Business /Microsoft Lync, WebRTC, and audio

Connect From Any Device

Whether in the office or working remotely, join meetings anytime, anywhere, from any device.

- Video endpoint
- Desktop/laptop
- Tablet
- Smartphone
- Office phone

Flexible Pricing Plans

- **Per License:** Pay only for the number of licenses you need, enabling everyone in your organization. Each user license receives 1 VMR that can host up to 25 participants
- **Per Port:** Purchase only the capacity you need, quickly adding more as you grow. With our port model, you can provision an unlimited number of VMRs to support your users

Easy Content Sharing

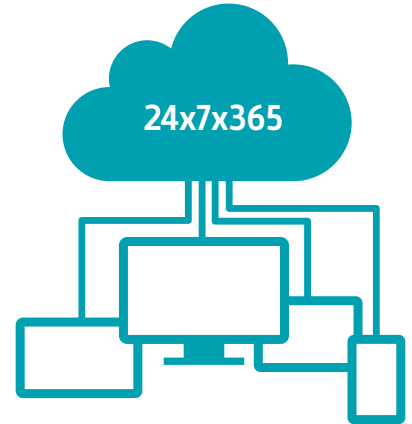

- Share and view data wirelessly to enable real-time, in-meeting collaboration
- Compatible with H.239, BFCP, RDP and WebRTC content sharing

As-a-Service Cloud

- OPEX/Pay-As-You-Go/Subscription
- No need to acquire or deploy infrastructure
- Rely on 24x7x365 constant monitoring and maintenance by trained professionals

Hosted Private Cloud

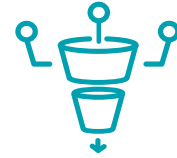

- All resources - hardware, network, etc. - are dedicated exclusively to your organization
- No need to store hardware on premises

Key Features

Cost effective:
add users as need increases

Reduce bandwidth
bottlenecks

Self-Service End User Portal

- **In-Meeting Controls:** Participant list, muting, enable data sharing, add/disconnect participants
- **Account Controls:** View and edit your VMR alias, optional PINs, password, call connection details
- **Administration:** Provision, manage and pull usage reports for all of your accounts

Branding Options

Custom graphics for landing page, portal and WebRTC
Create a custom URL for your portal

- Native Microsoft Lync / Skype for Business interoperability
- Customer Administrator feature: empowers you to manage your VMR service and support your users directly
- User Portal: manage your VMR, schedule meetings, conference controls, reporting
