Take control of collaboration.

Lenovo IP Controller

Modern and sophisticated with a high-end low-profile design, the Lenovo IP Controller enables easy-to-use Ethernet connectivity (CAT5e) with PoE. Addressing the growing demand for meeting participants to plug their laptop directly into the controller (HDMI on table), the Lenovo IP Controller allows for installation up to 100 meters from the compute, without the hassle of extenders, complicated installation, or needing power at the table—so you get no-lag collaboration.

Both the Lenovo ThinkSmart Controller and the Lenovo IP Controller can sit on a desk or conference table, but the Lenovo IP Controller can be wall-mounted for an even cleaner aesthetic and to free up table space. Whichever controller you select, you'll get an intuitive 10.1" screen with a 10-point anti-glare, anti-fingerprint touch display on a familiar Microsoft Teams Rooms interface to initiate and control your meetings, share content, and communicate easily.
