## DATASHEET

# LOGITECH SIGHT

Help remote employees get the best perspective in every hybrid meeting with Logitech Sight. This AI-powered tabletop camera works hand in hand with Logitech Rally Bar or Rally Bar Mini to capture, identify, and present virtual attendees with the best sound and view of the meeting room action.

### **TABLETOP CAMERA WITH INTELLIGENT MULTI-PARTICIPANT FRAMING**

Sight helps remote meeting participants see and hear everyone clearly so they feel like they're actually seated at the table, and not just sideline observers.

Working together with Rally Bar or Rally Bar Mini at the front of the room, Sight sits on the table and uses audio and video to intelligently detect, frame, and present participants around the table.

By integrating with the leading video conferencing platforms like Microsoft Teams, Zoom, and Google Meet, Sight enhances the hybrid meeting experience by providing more dynamic and inclusive views of the meeting room action.

## TWO VIEWPOINTS. BETTER PERSPECTIVE.

### Works with Rally Bar and Rally Bar Mini

Sight works with the front of room camera to detect conversations, capture audio and video, and present the best view of active speakers to remote participants.

### See and hear clearly into larger rooms

With a pickup range of 2.3 m or 7.5 ft, Sight is designed for medium-to-large rooms, intelligently detecting and capturing conversation and nonverbals clearly, all around the table.

### Track conversations naturally

Enabled through RightSight with Smart Switching\*, adaptive intelligence chooses the best front-facing angle from the camera on the table or at the front of the room, tracking participants as body positions change and conversations shift.

\*Smart Switching not available at launch. Support varies by video conferencing provider.

## WORKS WITH LEADING VIDEO PLATFORMS

Leverage the video conferencing platforms and features you already use. Sight integrates with leading video platforms like Microsoft Teams, Zoom, and Google Meet to make hybrid meetings more equitable and inclusive.

## CRYSTAL CLEAR AUDIO AND VIDEO

- 1 **315° video capture:** Captures participants around the table with dual lenses that capture up to 4K resolution.
- 2 **Directional mic pickup:** Detects active speakers using direction of arrival of voices. 7 beamforming mics replace the need for a mic pod.
- 3 **Mic mute controls:** With the touch of a button, users can quickly and easily mute or unmute the microphones in the room.
- 4 **Indicator lights:** The 3 colored LEDs clearly indicate video on/off, mute on/off, in-call status, power status, and more.
- 5 **Magnetic privacy shade:** Slide the magnetic shade in front of the lenses to automatically turn off video capture.
- 6 **Included mounts for a secure install:** Secure Sight and route cables across the table using the table mount. Use the grommet hole mount to hide cables down through the table. Place Sight in non-traditional rooms with U- or V-shaped tables by securing it to a tripod stand.
