

Leverage the Power of Generative AI

Integrated with the Q & Q Pro

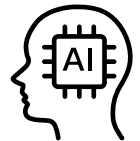

LLM Sourced from Vetted Content

Control With Your Voice

Private, Safe & Secure

Like having your own AI assistant

DISCOVER THE MAGIC OF NEWLINE + MERLYN AI

With the power of Merlyn AI, Newline's interactive panels are easier to use than ever! The Newline Q and Q Pro Series interactive panels with Merlyn AI allows users to leverage the power of generative AI during collaborative sessions and business meetings to deliver text and images that enhances engagement, fosters creativity, and provides intelligent content generation to elevate the user experience.

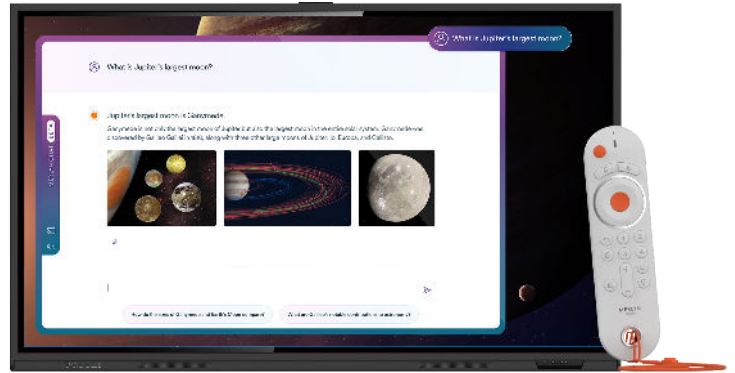

Built on the first large language model designed specifically for education, Merlyn AI generates content from vetted resources and shows attribution to source material. Using natural language voice commands, users can access all of the Newline features they know and love from anywhere in the room.

With generative AI and voice control from Newline with Merlyn, tech disappears into the background, so you can keep your focus on the things that matter.

Newline with Merlyn AI is here, and your technology will never be the same.

AI, the right way

- Leverage the power of Merlyn's generative AI during collaborative sessions and meetings to deliver text and images that enhances engagement, fosters creativity and provides intelligent content generation to elevate the user experience.
- Merlyn AI is built on the first large language model (LLM) designed specifically for educational settings so you can be confident that Merlyn is pulling from vetted content and resources, not from the entirety of the internet.
- Merlyn AI is designed to show attribution to source material and prioritizes low hallucinations—it won't provide false or made-up information.
- Merlyn AI is safe, secure and private, and does not sell personal information, retain voice audio after processing, or use voice audio to identify individuals.

Control your Newline panel with the power of your voice

Using the power of Merlyn AI and natural language voice commands, users can access all of the Newline features they know and love from anywhere in the room:

- Whiteboard
- Annotations
- Screenshot
- Control built-in browser
- Switch between displays
- Open/close panel apps
- Create timers
- Clock
- Weather
- Enable/disable touch
- Brightness/backlight
- Control volume
- And more!
