APPSPACE

Navigate your spaces

Build an interactive, captivating, and engaging experience that gets people from point A to point B.

Wayfinding can be deployed on your existing touch-screen devices and kiosks to help employees and guests navigate complex campuses and buildings and locate various points of interest. Appspace offers three different Wayfinding packages to meet your needs, whether simple or complex. If you can imagine it, we can likely build it.

Basic

For clients wanting to simply find a location and possibly book a space on a floor.

- Project Manager
- Mapped reservable resources utilizing Appspace, Google, or Microsoft calendars
- Corporate branding
- Portrait & Landscape views
- Channel Browsing mode with multiple content channels
- Standard documentation

Premium

For clients who want to search for specific types of spaces or amenities.

Everything in Basic, plus:

- Advanced keyword search and filters
- Advanced Channel option
- QR code booking for Appspace Employee App
- Customized documentation

Elite

For clients who want a fully customized kiosk experience that wows employees and visitors.

Everything in Premium, plus:

- Customized kiosk interface and functionality
- Animated pathways
- Screensaver mode
- Custom integration with third-party calendar scheduling tools (On-Premise Exchange, EMS, iCal, ECal, and Resource Booker)

It's all part of the Appspace platform
