

Avaya Spaces—Workstream Collaboration for the Work-From-Anywhere Era

In today's on-demand workforce, work gets done regardless of location or set schedules. We all need tools that streamline tasks and unify teams. Working from anywhere means business decisions need to be made in an always-on, dynamic environment. Avaya Spaces is there to pull it all together. Create a project space, check in anytime, converse from anywhere. Brainstorm, align, update; get the excitement and connection that we miss from the office.

- **Keep the Conversations Going** — Chat about project details in or out of the meeting. Spaces saves everything, so you don't have to.
- **Have the Biggest Meetings** — Invite up to 1,000 people. Use the 61-participant HD concert view to bring your session to the next stage of face-to-face.
- **Better Experiences with Powerful AI** — Meet, teach, sell, and create like a pro. Grab attention with immersive presenter. Eliminate background noise. Leverage AI from the cloud on any device, now or old.
- **Get Rich Digital Calling** — Instantly go from chat to video with one click. Spaces digital calling is backed from the reliability of Avaya infrastructure.
- **Innovation with CPaaS at the Core** — Provides a dynamic framework for innovation – enabling the flexibility and richness of the API economy.
- **Security is in Our DNA** — Not only are we HIPAA and GDPR compliant, Spaces has over 30 security features— including unique private spaces that keep you from getting video-bombed.

Protect your information from hackers and keep your conversations safe and secure.

While what happens in the meeting is important, so is what happens before and after. Use Avaya Spaces to track deliverables and keep tabs on what's urgent. When someone sends a message, uploads a document, assigns a task or shares a resource, it's all organized in the team Space, a record of everyone's contributions. As one team member ends their day, another can pick up the thread with Spaces.

Rely on Avaya Spaces to boost relationships and build communities. And when you need to go from the virtual room to the physical room, take Spaces with you. Connect it to the cloud apps and technologies you use today, and the new ones you'll be using tomorrow, along with APIs to build the workflow you need. Get protection to help keep out hackers and the information you share safe and secure. Collaboration outside your organization is easy, just send them a link.
