PROFESSIONAL

# POWERED. PRECISE. MODULAR.

## MSA12X

powered beam-steering array loudspeaker

MSA12X is engineered for vocal intelligibility and musicality—even in acoustically challenging spaces.

Digital steering allows precise vertical sound control and mounting height flexibility—no mechanical aiming or angling brackets required. Wide 160° horizontal coverage lets you reach every seat with consistent tonality. And dual-beam functionality enables the vertical sound beam to be split to cover separate areas such as the main floor and a balcony. Plus, you can stack up to three modules for more coverage, control, and enhanced dual-beam precision.
