Small rooms
2~6 seats

Easy-to-use meeting is highly demanded in morden work, which makes huddle room important to empower your staff to quick connect and join meeting to start the conversation, bringing people together from local and remote teams and accelerating the efficiency.
Medium rooms
6~12 seats

Usually there have longer table and more seats in medium-size room. One common-sized display or two side-byside displays help participants all see both content and remote colleagues. A camera, tabletop audio device and meeting controls make it easy to start meetings and have a good meeting experience.

Large rooms
12~16 seats

Conference rooms allow for collaboration and face-to-face interaction in a private setting, connecting both on-site and remote employees. One very large display or two side-by-side displays to share content and see remote colleagues. A camera and tabletop or ceiling audio devices can enhance the audio quality, ensuring everyone is heard clearly. A touch console make it easy to start meetings and control the other room devices.

Extra-large rooms
over 16 seats

For extra-large space like training room, creating an environment where people can be fully focused, collaborated and engaged is essential. Two large side-by-side displays to share content and see remote colleagues. Multiple cameras and ceiling audio devices are needed, ensuring everyone is seen and heard clearly. A touch console make it easy to start meetings and control the other room devices. Beyond that, how to keep people consentrated on the speaker and the meeting is critical.

FULLY CAPTURED,
ENJOY PEERLESS VIDEO EXPERIENCE

Yealink UVC84/86 camera achieves a gorgeous video experience perfectly for medium and large rooms.With a range of AI-driven features, it empowers your meeting space by reproducing every moment and detail precisely.

Auto Framing
Automatically recognizes the number and the positions of attendees, which continually adjusts as more participants enter the space, eliminating manual setups.

Speaker Tracking
Speaker Tracking frames a real-time close-up of the speaker, bringing a vivid face-to-face meeting experience.

Presenter Tracking
The camera follows the presenters around the room when they are presenting, making them always in the center of the view of the camera.

Multi-camera System
Empowered by AVHub, up to 9 UVC84/86 cameras can connect simultaneously from a single room, better capturing participants and providing different views of the rooms.
