

Easy Collaboration, High Productivity

## YEALINK ZOOM ROOMS SOLUTIONS

Want to know more about Yealink Zoom Solutions?

# Partnership with Zoom

**Oded Gal-Chief Product Officer**

"While Zoom is flexible and powerful enough for large conference and training rooms, we have seen the prevalence of smaller huddle rooms in recent years, and we know that most of these spaces are woefully unequipped to handle the needs of today's workforce. By working together with Yealink, we can empower more teams with collaboration spaces that are enabled with video, audio, and screen sharing."

**Stone Lu - Yealink's Vice President**

"Our full range of videoconferencing solutions have achieved Zoom compatibility, and now we are excited to see our cooperation with Zoom deepen with this new joint solution. Video collaboration is unquestionably one of the most effective tools to enhance business productivity but it's not a tool reserved for large enterprises. We are making video collaboration accessible for everyone. The joint solution is just a beginning and we look forward to further cooperation with Zoom."

## Cooperation Between Yealink and Zoom
